TOUGHER WITH TIMBER!

Life is just too short for bad garden sheds!

So it stands to reason that flimsy, non-framed sheds just aren't worth the money that you spend on them!

That's why with Duratuf, all our garden sheds have a timber framing system for added strength, rigidity and better weatherproofing.

Timber, grown and milled here in New Zealand from renewable plantations is treated to NZ standards and transformed into the backbone of your Duratuf garden shed.

Duratuf Garrison garden sheds have a robust semi-timber framing system that features interlocking top and bottom frames for economy and strength.

This system not only increases the strength of the shed, but removes the need for steel channels at the bottom of the wall that can potentially become blocked and cause corrosion and leaking.

duratuf.co.nz

SAFE FROM THE WEATHER

Lets be honest, if we wanted our gear wet, we'd leave it outside!

So when we put it in a garden shed, one key consideration is that it won't get wet. However, rain water trapped in flashings and channels around your shed can often lead to leaks and corrosion.

Duratuf Garrison sheds are designed without a channel at the bottom of the walls, and with spoutings that let water flow freely away from the shed, helping to eliminate unwanted leaks and rusting.

PEACE OF MIND

Duratuf steel looks great and is available in zinc and four popular colours.

The hi tensile, 0.3mm thick steel cladding is roll formed here in New Zealand with material sourced from the world's leading steel mills and is backed up by a comprehensive 20 year warranty.

ENVIRONMENTALLY RESPONSIBLE

Help the environment through using a renewable resource for the framing. Every little bit helps in looking after the environment.

SHED BUYING CHECKLIST

In this day and age, you've just got to check what you're buying before you part with your hard earned cash. With everyone trying to sell the cheapest products, it's sometimes easy to forget that there are no free lunches. You get what you pay for!

To make it easy for you to cut through the clutter, we've done a checklist of some of the most important things to look out for when you buy a garden shed.

Naturally, Duratuf Garrison ticks all the boxes!

Where's it made? Be very aware that manufacturing standards aren't the same worldwide. Duratuf Garrison — Manufactured right here in NZ	✓
How realistic is the claimed warranty? Is there a NZ company that can honour the warranty in 10 or 15 years' time, or will the product and supplier be gone from the market? Duratuf Garrison — 20 Year warranty from a NZ company established in 1993	✓
How thick is the steel, and is it high tensile? High tensile steel is important as it doesn't bend and dent as easily, meaning that it stays looking better for longer. Duratuf Garrison — Hi Tensile, 0.3mm thick steel, roll-formed right here in Hamilton NZ	✓
Has it got any framing? Many garden sheds have 4 wall panels, put together without a structural frame. Duratuf Garrison — Features NZ grown and milled timber top and bottom plates. Treated for rot-resistance, this frame gives extra strength and rigidity and ensures that your Garrison shed will stand up to NZ's harsh weather conditions for years to come.	✓
Can rain water easily drain away from the shed? Duratuf Garrison — Has no steel channel at the base of the walls that dirt and water can sit in. Water is able to flow away from the shed without obstruction to help prevent corrosion and leaks.	✓
Can I easily adapt this shed to my needs? Duratuf Garrison — The semi-timber frame gives a great base to attach extra accessories such as shelves, work-benches, wall linings etc without bending the panels or puncturing the steel cladding.	✓

Don't settle for less than 100%! 6/6

FIND THE SHED FOR YOU!

SKILLION

Roof slopes to the front - ideal for up against the house to ensure that any rainwater runs to the front.

LEAN-TO

Roof slopes to the rear - perfect for against the fence or in the open, as water runs away from the door area.

GABLE

Slopes away from the centre - the strongest option for larger sheds that provides added headroom in the centre.

BIG ON ROOF STRENGTH

With bigger garden sheds, it's especially important that they have a strong framing system to support the larger walls and the bigger roof span.

The Garrison gable roofed sheds not only have the timber wall frames for strength, but also a strong timber ridge beam structure to support the bigger span. Don't settle for anything less!

GABLE ROOF | LARGE

COLOURS

Products may vary from illustrations.

Duratuf Garrison sheds feature a hi-tensile, deep ribbed 0.30 gauge steel cladding. Formed right here in New Zealand, it is available in a classic no-rust Zinc/Aluminium finish, or your choice of four popular colour pre-painted steel options.

ACCESSORIES

TIMBER FLOOR KIT

Designed to fit snugly inside your Garrison shed, the floor kit includes all materials and fixings needed for easy installation.

PEG DOWN KIT

Used to anchor your Garrison shed down to sand or dirt substrates.

Kit includes 6 x H5 pegs and stainless steel screws. Tools required; Sledge hammer and screwdriver.

BOLT DOWN KIT

The Duratuf Bolt-down kit is used to mount your Garrison shed securely to a concrete base, with a unique bracket which tightly clamps the base plate to the concrete floor. All fixings included.

CLEAR ROOF PANEL

Provides UV free, natural daylight and fits in place with one steel roof sheet.

Please note that clear panels may condensate more than steel.

5 TIER SHELF UNIT

Bolt free interlocking kitset frame with MDF shelves and 350kg load rating per shelf. Size: 0.90m W x 0.40m D x 1.80m high.

HEAVY DUTY WORKBENCH

Lock together construction with MDF shelves.

Size: 1.14m W x 0.50m D x 0.90m H.

TOOLS REQUIRED

Optional extras incur freight charges when ordered separately. Timber floor kits, where shown, are purchased as an optional extra.

EASY ACCESS

The innovative Garrison 'door-and-a-half' system on the 3 metre sheds creates a practical extra wide door for everyday use.

When you need to load those bigger items such as motorbikes and ride on mowers, simply open the half door and you have a total door opening of 1420mm.
